

*Those of us who were on the Board of Directors were so thrilled to receive the grant from the Foundation. A decision was made to protect that gift and use it for cases of extreme need. As time went by, the art center did fall on difficult financial times. That very grant allowed us to keep the art center from closing. -Georgia Nickles, JCAC*

*Funding from the Foundation helped provide Johns Creek residents with a beautiful recreational, educational, and cultural facility where the natural environment and Johns Creek history can be enjoyed today, but also preserved for the future. -Joan Compton, Autrey Mill Board of Directors*

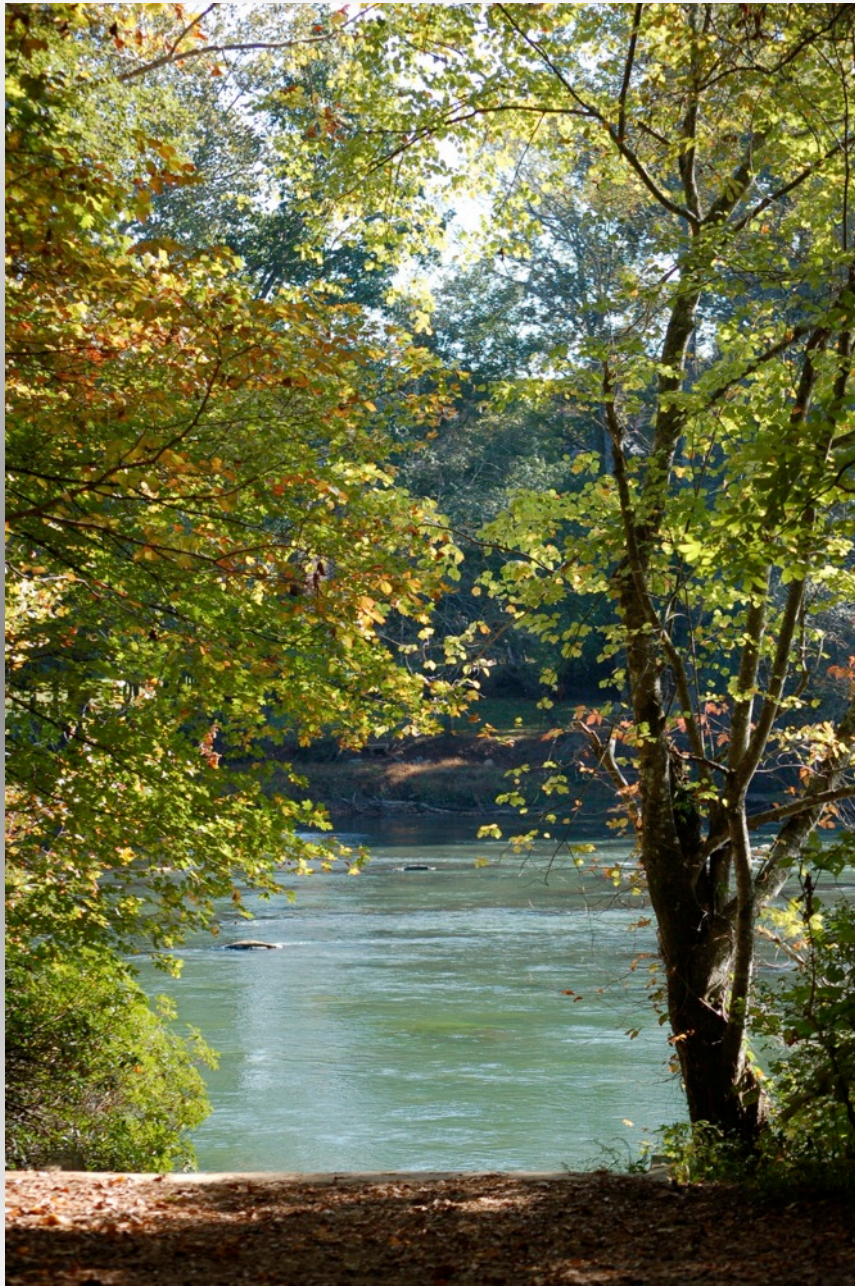

*The Johns Creek Foundation understands and appreciates the importance of the arts as a quality of life issue for the residents of Johns Creek. This active partnership ensures that entities like ours will always have the means to provide a rich artistic experience to our community, and for that we are grateful.*

*–Wayne Baughman, Johns Creek Symphony Orchestra*

*With the generous grant from the Johns Creek Foundation, we were able to fund a study and design for walking trails in the Chattahoochee River National Recreation Area. This is an important first step toward realizing the dream of being able to experience and enjoy the natural beauty of the Chattahoochee River, our most precious asset.*

*--Cleve Gaddis, Johns Creek Beautification*

*We hope it will be a place where young people come to explore their creativity, families come to experience art and literature, and older people come to nurture the magical possibilities in themselves and others in a supportive community. The Johns Creek Foundation did no less than to make this dream seem possible.*

*—Margarita Moldovan, PAN*

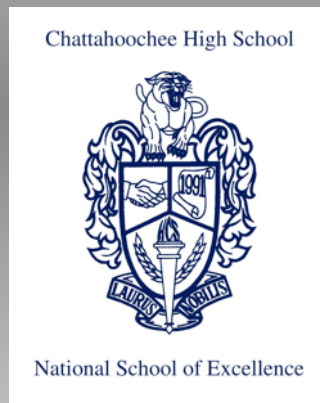

*A brilliantly sculpted campus now shines even brighter than before thanks to the generous donation given by the Foundation. The Hands on Northview project has touched more than just the lives of the students and faculty; it has touched the community of Johns Creek.—Northview PTSA*

The funds are being used to purchase a windmill and a solar panel which will each provide electricity to air stone diffusers to add oxygen to the CHS outdoor classroom detention pond known as The ARCH.

*With the generosity and support of the Johns Creek Foundation, we believe that our outdoor classroom can be a model for the nation on managing habitats, utilizing alternative energy sources, and finding new ways to capitalize on existing resources.—Chattahoochee Cougar Foundation*

## Johns Creek High School Garden and Lighting Project

*The kind donation will allow us to move forward with a long-desired project. Working closely with our Johns Creek Pike Nursery, two gardens will be created on either side of our front, main entrance to enhance the plaza area. These gardens will be filled with drought-resistant plants and those best-suited for the location. Architecture course students are involved through the creation of the plans and renderings. The PTSA will add lighting to these gardens that will soon spotlight our large United States Flag and beautiful signature clock tower at the front entrance. We see this improving the beauty of the front of the school and the area for all passer-by. The lighting will allow us to illuminate our United States Flag at night adding more beauty and encouraging a feeling of patriotism. —JCHS PTSA*

*The Johns Creek Foundation proudly supports the Johns Creek Relay for life when every spring, thousands of residents come together to support one another in the fight against cancer in our community. Funds from the Foundation support the distribution of educational materials and light up the night with HOPE in the luminaria ceremony. Please join us on May 5, 2012 at Johns Creek High School.*
